

## Power Monitoring Sensor (PMS)

The AKCP Power Monitor Sensor gives vital information and allows you to remotely monitor power eliminating the need for manual power audits as well as providing immediate alerts to potential problems.

It has been integrated into the base unit web interface with its own "Power Management" menu, allowing up to six three phase and fourteen single phase Power Monitor Sensors to be set up on a single securityProbe or SPX+. More PMS can be connected to a single base unit depending on what readings are required.

Data collected over time using the Power Monitor sensor can also be viewed using the built in graphing tool. Combining this durable Power Monitor Sensor with the SPX+ or securityProbe base unit creates an IP-enabled power monitoring capable of monitoring:

- Phase Line Voltages
- Current
- Power Factor
- Active Energy
- Active Power
